

## SEA SPIRIT *Marine Services*

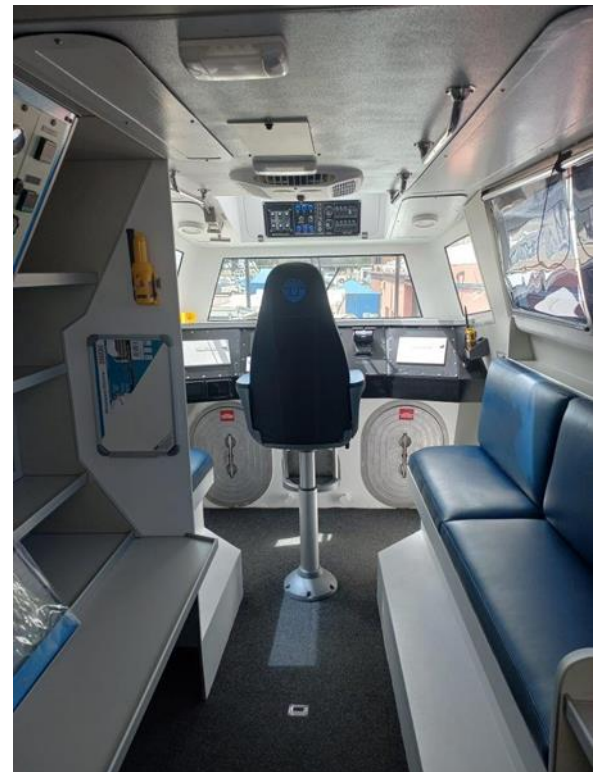

Aqueos Corporation, under its marine service line, provides marine construction, diving, ROV and vessel services and project management. These services include new construction, inspection, maintenance, and repair (IMR) and decommissioning for traditional oil field, civil, military, and renewable resources markets.

Sea Spirit services are offered via a custom-built, special purpose vessel. This unique, purpose-built vessel has built-in IMCA audited diving equipment for surface-supported diving, air, or NITROX, to ~100' depth. The vessel is designed to function as a daughter craft, deployed from a "mothership" to provide access to locations not accessible to the larger DSVs. The mothership will provide a secure cradle or launch & recovery garage for onboard storage of the vessel as well as decompression chamber and HP air/NITROX compressors. The divers will be accommodated onboard the mothership.

In addition, the vessel can be moved onshore via a conventional trailer and launched at typical boat launches for inland, coastal, or river applications.

Year Built	2023
Manufacturer	Unique Group
Length Overall	46 feet
Beam	11.5 feet
Draft	2.3"
Max Speed	20 knots
Cruising Speed	15 Knots
Range	90 Nautical Miles at 15 knots (cruising speed)
Hull	Deck & Pilothouse, Aluminum
Lifting	Single point hoisting on the vessel itself or vessel can be deployed via drive-in/drive-out garage frame or transported via trailer for onshore or coastal projects
Seating	1 Marine and 7 Divers
Pilothouse	Fully enclosed, heated and air conditioned

Built-In Dive Equipment	HP Air or NITROX, Dive Control Station suitable for diving two divers simultaneously and a standby diver, video, HP gas storage, dive computer
Onboard Gas Storage	~5,000 cu. Ft of HP air or NITROX, separated into primary, secondary and standby diver.
Navigation System	Navico/Simrad network system with Simrad NSS Evo3 radar, depth sounder, and VHF radios
Aft Clear Deck	120 sq. ft. total
Accommodations	Provided onboard mother ship or onshore, toilet facility is onboard
Onshore or Mothership Support	Crane or Lifting support, Decompression Chamber package, HP air or NITROX compressors, HP bottle package, vessel refueling capability, accommodations for crew
Recovery Davit	A 350kg rated A-frame davit on stern to recover an injured or unconscious diver
